

SPECIFICATION

StreamFlow Bubblers

Part # GSBxxxxxx

The inlet of the emitter shall be threaded with one-half inch female threads so that it may be screwed onto a standard one-half inch male threaded fitting or nipple. The bubblers shall be available in adjustable flow rates and length of throw. The StreamFlow bubbler shall have an adjustable cap that can tailor the amount of water to the application. The available patterns shall be 90°, 180° and 360°

Features:

- 1/2" FIPT (GSBXxx050) or Barbed Base (GSBXxx025) configuration to handle every design situation.
- Available patterns shall be 90°, 180° and 360°.
- Rugged design using UV Inhibiting Engineering Grade plastics to ensure maximum life span.
- Barbed emitters are compatible with PVC or Polyethylene Tubing. 1/2" FIPT emitters are compatible with all standard 1/2" MIPT fittings.

Operating Range:

Pressure: 5-65 PSI

Filtration: 80-150 Mesh

The StreamFlow bubbler shall be as manufactured by GPH Irrigation, Fontana, CA.
