- Hardware to mount a sign is included.
 - (2) Washers
 - (2) 2 x 1/4" Bolts
 - (2) Locknuts

ASTM A499 Grade 60 — This is the primary standard for the base steel material. These posts are made from high-strength, re-rolled rail steel (from T-rails weighing 91 lb/yd or heavier). With a minimum yield strength of 60,000 psi and tensile strength around 90,000 psi.
ASTM A123 (or A123/A123M) — Certified hot-dip galvanizing for corrosion protection. Posts are galvanized after fabrication (cutting, punching holes, etc.) for a durable zinc coating suitable for outdoor use.
